Professional Summary

Full-Stack Developer and Software Engineering student with experience building web, mobile, kiosk, and AI-assisted applications using TypeScript, C#, Python, React, Next.js, NestJS, and PostgreSQL. Focused on scalable backend systems, clean architecture, and product-driven development.

Education

Laguna University

2023-2027

BS in Information Technology – Specialized in Systems Development

- Dean's Lister
- Vice President's Lister

Projects

PrintBit

Tech: HTML, CSS, TypeScript, Node.js, Express.js, C# Worker Service, SQLite, ESP32

- Designed and developed a self-service printing kiosk supporting document printing, scanning, and photocopying.
- Integrated printer communication and status monitoring for paper and ink detection.
- Built backend services for payment handling, print job management, and hardware coordination.
- Developed communication workflows between Node.js services, C# background workers, and kiosk hardware peripherals.
- Deployed on Windows kiosk environments with assigned access mode.

Hotel Management System

Tech: React, Django, MySQL

- Developed a hotel management platform for room reservations and property administration.
- Implemented authentication, room inventory management, amenities management, and booking workflows.
- Designed REST APIs and database schema for scalable reservation tracking.

Commitly

Tech: React Native, Firebase, TypeScript

- Built a developer productivity platform integrating Git activity tracking, developer reflection, and progress journaling.
- Implemented repository analytics, progress visualization, and daily development insights.
- Designed database structures for activity aggregation and historical tracking

Technical Skills

Languages: JavaScript, TypeScript, Python, C#

Frontend: React, Next.js, Svelte, React Native

Backend: NestJS, Express.js, Django, Flask, FastAPI, ASP.NET Core

Database: PostgreSQL, MySQL, SQLite

Tools: Expo, Postman, Git, GitHub, Jest

Architecture: REST APIs, Authentication, Database Design, Full-Stack Development, System Integration
